# Executive Summary: Report on Available Apprenticeships in Texas, Program Year 2025

## Introduction

This report, mandated by Texas Labor Code §302.0191, provides an overview of active registered apprenticeship programs in Texas for Program Year 2025 (PY 2025). It analyzes the current apprenticeship landscape, examines in-demand and emerging industries and occupations, and offers recommendations to expand apprenticeship opportunities to meet the evolving workforce needs of the state. The data is sourced from the U.S. Department of Labor-Office of Apprenticeship and reflects active Texas apprenticeships. Industry projections and occupational staffing patterns are sourced from the Texas Workforce Commission (TWC) Labor Market Information (LMI).

## Key Findings

- **Active Programs:** As of PY 2025, there are 961 active apprenticeship programs in Texas, spanning 47 industry subsectors.
- **Active Apprentices:** Approximately 35,585 active apprentices are participating in these programs.
- **Industry Concentration:** A significant portion of programs and apprentices are concentrated in the Specialty Trade Contractors, Hospitals, and Educational Services industries.
- **Projected Growth Alignment:** Active apprenticeship programs exist in a majority of the 25 industries projected to add the most jobs between 2022 and 2032.
- **In-Demand Industries:** High demand continues in industry sectors, including health care, technology, construction, and skilled trades.
- **Emerging Industries:** Texas shows significant growth in technology, advanced manufacturing, and energy.

## Recommendations

The report recommends continued efforts to:

- Promote and support work-based learning models, including apprenticeships.
- Collaborate with employers and other stakeholders to address training needs in emerging and high-demand industries.
- Increase access to pre-apprenticeship and youth apprenticeship programs.
- Monitor industry trends and align apprenticeship programs with evolving workforce needs.
- Prioritize the development of apprenticeship programs in rural areas.
- Encourage the use of technology and online learning resources.

## Changes Observed Between the 2022–2023 (PY 2024) and 2023–2024 (PY 2025) Reports

- **Increase in Number of Programs:** The number of active apprenticeship programs increased from 863 in PY 2024 to 961 in PY 2025, reflecting a growth of almost 100 programs.
- **Increase in Number of Apprentices:** The number of active apprentices increased from 32,625 in PY 2024 to 35,585 in PY 2025, an increase of more than 2,900 apprentices.
- **Shift in Industry Rankings (by Number of Programs):** While Specialty Trade Contractors and Educational Services remain the top two industries with the most active programs, Utilities has dropped from the top three to a lower position. Heavy and Civil Engineering Construction moved up in the rankings.
- **Shift in Industry Rankings (by Number of Apprentices):** Specialty Trade Contractors, Hospitals, and Educational Services remain the top three industries, but the numbers within each industry have shifted, reflecting changes in apprenticeship uptake and staffing needs.
- **Focus on Emerging Industries in 2023–2024 Report:** The 2023–2024 report contains a new section explicitly highlighting emerging industries, with employment projections and the number of apprentices in those industries.

- **Emphasis on Location:** The 2023–2024 report shows heat maps of where the active apprenticeship programs are located across the state to see how well programs are aligning with the projected growth areas.

## **Conclusion**

The apprenticeship model is a valuable tool for developing a skilled workforce in Texas. The observed growth in both the number of programs and apprentices indicates increasing recognition of the benefits of this "earn while you learn" approach. Continued focus on expanding opportunities in high-growth and emerging industries, particularly those with limited current engagement, is crucial to ensuring Texas remains competitive in the global economy. The Texas Workforce Commission is dedicated to empowering businesses and individuals through robust funding initiatives and proactive facilitation of high-quality apprenticeship program development across the state.

# Report on Available Apprenticeships in Texas, Program Year 2025

## Introduction

[Texas Labor Code §302.0191](#) states that the Texas Workforce Commission (TWC) must report on active registered apprenticeship programs in the state and make recommendations to expand the availability of apprenticeship programs in emerging and high-demand industries and occupations.

This report includes a description of the current apprenticeship landscape in Texas, an examination of high demand and emerging industries and occupations, and an overview of active apprenticeship programs meeting workforce needs. This report concludes with recommendations on how to expand apprenticeship programs in Texas.

The apprenticeship data used in this report is provided by U.S. Department of Labor-Office of Apprenticeship and reflects active Texas apprenticeships during Program Year 2025 (PY 2025). An active apprenticeship program is defined as active if it has at least one active apprentice participating in the program at the time of this report.

Industry projections and occupational staffing pattern data are sourced from the Texas Workforce Commission (TWC) Labor Market and Career Information. Industries are classified using the North American Industry Classification System (NAICS), and occupations are defined using the federal Standard Occupational Classification (SOC) system.

## Available Apprenticeships in Texas

### Active Apprenticeship Programs

At the time of this report, there are 961 active apprenticeship programs offering training in 47 industry [subsectors](#)<sup>1</sup>. The industries represented range from construction and mining to education and real estate. A list of industries and the number of active programs is in [Appendix A](#).

*Figure 1: Top 10 Industries with the Largest Numbers of Active Apprenticeship Programs*

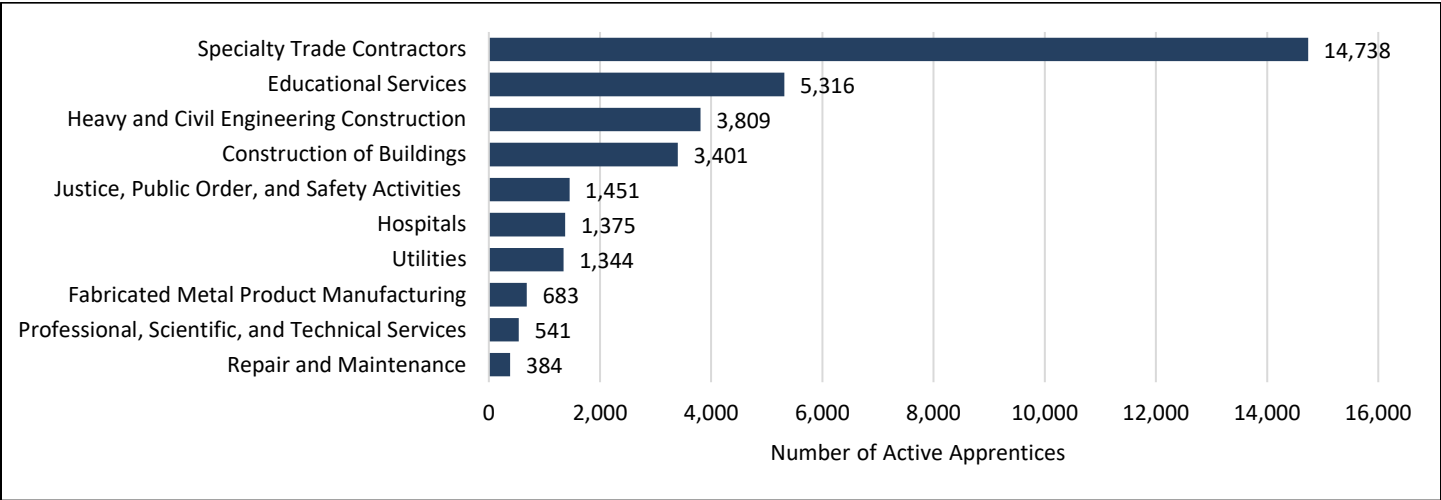

With 211 active apprenticeship programs, Specialty Trade Contractors (NAICS 238), which includes foundation, structure, and building exterior contractors; building equipment contractors; and building finishing contractors, make up almost 22% of the active apprenticeship programs in Texas followed by Educational Services (NAICS 611) and Heavy and Civil Engineering Construction (NAICS 237).

<sup>1</sup> For purposes of analysis, the Bureau of Labor and Statistics combines NAICS sectors into groupings called "supersectors." Supersectors contain sectors that are broken down further into subsectors. One way to envision this hierarchy is Supersector → Sector → Subsector.

Number of Active Apprentices

There are approximately 35,585 active apprentices in Texas. Apprenticeship programs within the Specialty Trade Contractor, Educational Services, and Heavy and Civil Engineering Construction industries contain over one-third of these individuals.

Figure 2: Top 10 Industries with the Largest Numbers of Active Apprentices

The full count of active apprentices and their programs can be found in [Appendix B](#).

Comparisons: Numbers of Active Programs and Apprentices, May 2024 and May 2025

The 2025 report marks the second report on the Available Apprenticeships in Texas. With two years of data for review, it is beneficial to compare numbers across the two reports and make note of any changes from one year to the next. Those comparisons follow.

Table 1. Industries with the largest number of active apprenticeship programs

Industry Subsector	Number of Active Apprenticeship Programs, 2024	Number of Active Apprenticeship Programs, 2025
Specialty Trade Contractors	195	211
Educational Services	171	201
Heavy and Civil Engineering Construction	54	99
Construction of Buildings	92	97
Utilities	74	82
Justice, Public Order, and Safety Activities	24	24
Professional, Scientific, and Technical Services	16	23
Hospitals	22	21
Repair and Maintenance	28	29
Administrative and Support Services	17	19

A comparison of the 2024 and 2025 DOL apprenticeship data reveals active apprenticeship programs experienced notable growth across key industry subsectors in Texas. Educational Services shows the addition of 30 programs in 2025,

an increase to 201 active programs from 171 in 2024. This increase suggests an expansion of apprenticeship opportunities in this subsector. Expansion can possibly be attributed to the [Texas Education Agency's](#) support of apprenticeships in response to the Teacher Vacancy Task Force's final report, [Developing a Thriving Teacher Workforce in Texas](#), to the Tri-Agency Commissioners' adoption and promotion of a [teacher apprenticeships initiative](#), and to districts' adoption of the apprenticeship model as promising practices are shared across districts experiencing similar workforce shortages.

It is also noteworthy that growth is occurring across both private and public sector industries. This trend could indicate both private and public sector employers are realizing the benefits of apprenticeships and are adopting the model as communities continue to grow in response to Texas' ongoing economic development.

*Table 2. Industries with the largest number of active apprentices*

Industry Subsector	Number of Active Apprentices, 2024	Number of Active Apprentices, 2025
Specialty Trade Contractors	11,997	14,738
Educational Services	3,462	5,316
Heavy and Civil Engineering Construction	2,183	3,809
Construction of Buildings	2,472	3,401
Justice, Public Order, and Safety Activities	999	1,451
Hospitals	5,302	1,375
Utilities	1,226	1,344
Fabricated Metal Product Manufacturing	416	683
Professional, Scientific, and Technical Services	132	541
Repair and Maintenance	2,246	384

The number of active apprentices also experienced marked growth across similar industry subsectors. Educational Services experienced a significant increase in apprentices, growing by 53.6% (from 3,462 to 5,316), and Specialty Trade Contractors showed substantial growth with a 22.8% increase in active apprentices (from 11,997 to 14,738).

As noted above, the sharp increases between 2024 and 2025 may be attributed to a growing demand for skilled workers—both private and public—and to the recognition that the apprenticeship training model is a powerful and proven strategy when addressing workforce shortages. The growth in numbers presents opportunities for further support and for tailored program development to address specific workforce needs.

### **Projected Growth by Industry and Number of Apprentices per Industry**

As detailed in the table below, there are active apprenticeship programs in Texas for a majority of the 25 industries projected to add the most jobs over the next ten years. Currently, only seven industries do not have active programs.

When reviewing the table, it is important to consider the current staffing of the industries listed. For example, [Food Services and Drinking Places](#) shows a 18.4% change by 2032, with eight apprentices currently working within occupations such as fast food and restaurant cooks. In comparison, [Educational Services](#) shows a 11.4% change with 5,316 apprentices currently working within occupations such as education administrators and elementary school teachers.

## Locations of Apprenticeship Programs

Because of the vastness of our state—254 counties across 28 Workforce Development Areas (WDAs)—it is helpful to examine the locations of active apprenticeship programs to determine if they are meeting the needs of the state’s emerging and in-demand industries and to consider ease of access for current and future apprentices.

Industry projections from TWC LMI provide critical insights into the evolving economic landscape of the state, highlighting industries poised for significant growth and identifying those facing potential contraction. These projections, grounded in historical trends and economic forecasts, offer valuable guidance for workforce development initiatives, educational programs, and individual career planning. Analysis of TWC LMI data reveals a consistent demand for workers in sectors such as health care, technology, construction, and skilled trades, driven by factors such as population growth, technological advancements, and infrastructure development. Understanding these in-demand industries is crucial for ensuring a skilled workforce prepared to meet the future needs of the Texas economy.

## In-demand Industries

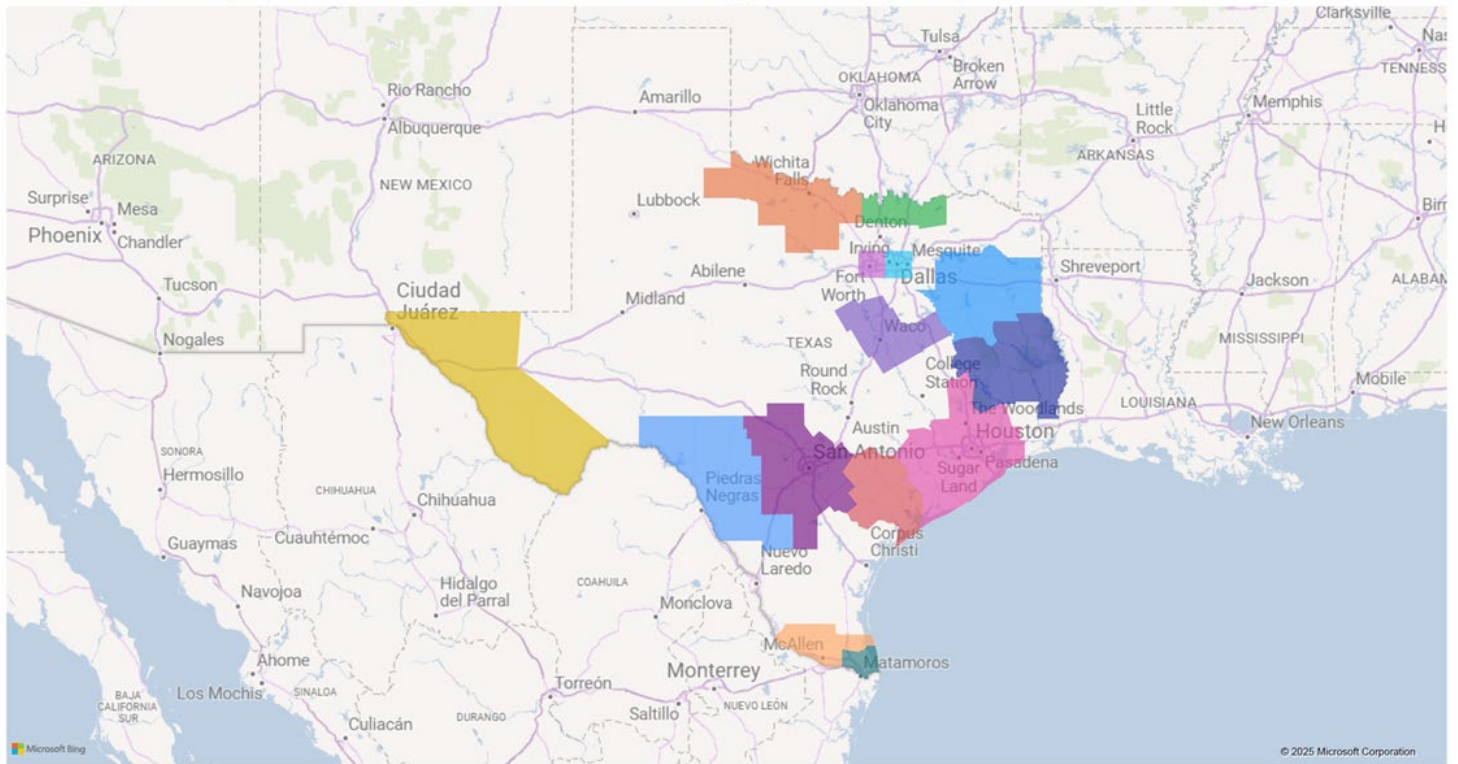

The following maps show the WDAs containing active apprenticeship programs for the five industries projected to add the most jobs based on the total number added from 2022 through 2032:

- Professional, Technical, and Scientific Services
- Food Services and Drinking Places
- Educational Services
- Ambulatory Health Care Services
- Administrative and Support Services

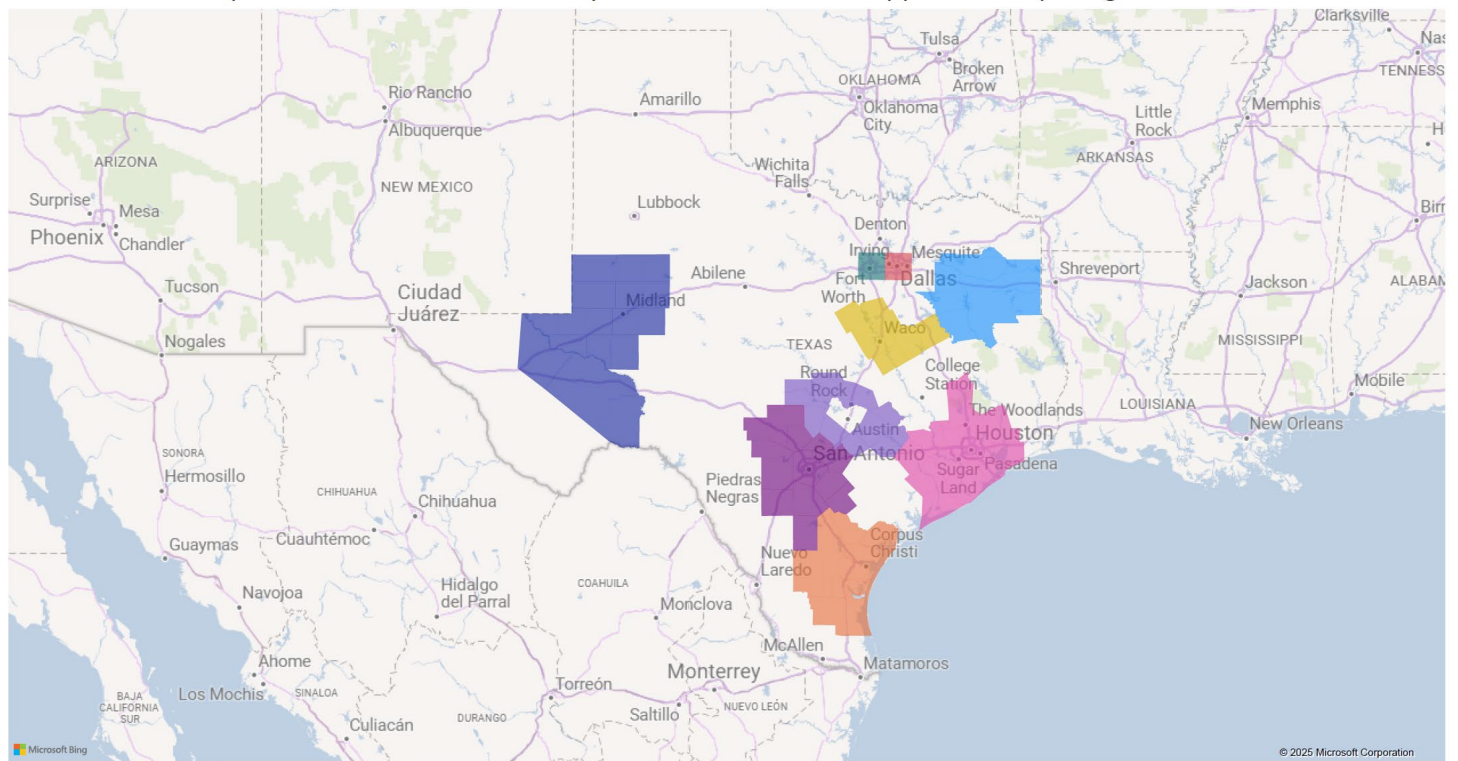

This map illustrates the geographic distribution of several ethnic groups across Texas and its neighboring states. The groups are represented by distinct colors: Mexican (pink), African American (blue), Hispanic (purple), Anglo (orange), and Native American (yellow). Major cities and state boundaries are also labeled for context.

## A detailed map of Texas and its surrounding states and countries. Major cities are labeled, including Phoenix, Albuquerque, Amarillo, Lubbock, Dallas, Fort Worth, Houston, San Antonio, Austin, El Paso, and Mexico City. The map shows the extensive network of highways across the region, with Texas being the central focus. The Gulf of Mexico is visible to the south and east.

## Workforce Development Areas with Ambulatory Health Care Services Apprenticeship Programs

## Workforce Development Areas with Administrative and Support Services Apprenticeship Programs

The complete list of industries and the number of apprenticeship programs located in each WDA are in [Appendix C](#).

## Emerging Industries

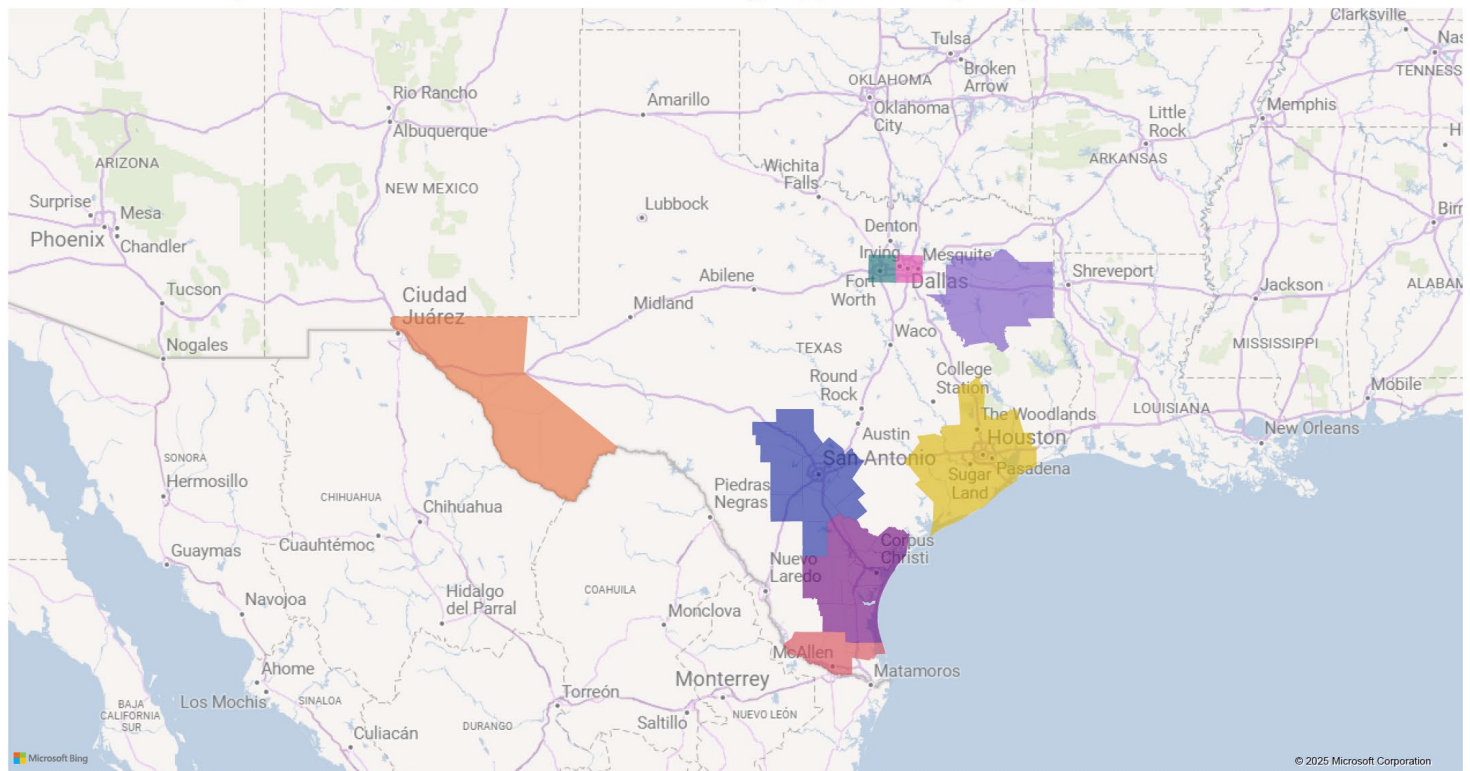

The next group of maps show the WDAs containing active apprenticeship programs for emerging industries in Texas.

*Table 4. Emerging Industries, 2022–2032 Employment Projections and Number of Apprentices*

Industry Title	Annual Average Employment 2022	Annual Average Employment 2032	Number Change 2022–2032	Percent Change 2022–2032	Number of Apprentices
Construction of Buildings	167,663	174,353	6,690	4.0	97

## A map of the United States and Mexico, showing major cities and highways. A red rectangle highlights the Dallas-Fort Worth area in Texas. The map includes labels for various states and provinces, as well as numerous cities. The highlighted area is centered around Dallas and Fort Worth, extending from approximately 32.5°N to 34°N latitude and 96.5°W to 97.5°W longitude. Other cities shown include Phoenix, Albuquerque, Houston, San Antonio, and Monterrey. The map also displays major highways and geographical features like the Gulf of Mexico and the Rio Grande.

This map illustrates the distribution of population density in Texas and surrounding regions, specifically focusing on areas with 100,000+ people per square mile. The map shows several major urban centers and their surrounding areas, color-coded to represent different population density levels. Key cities and regions include:

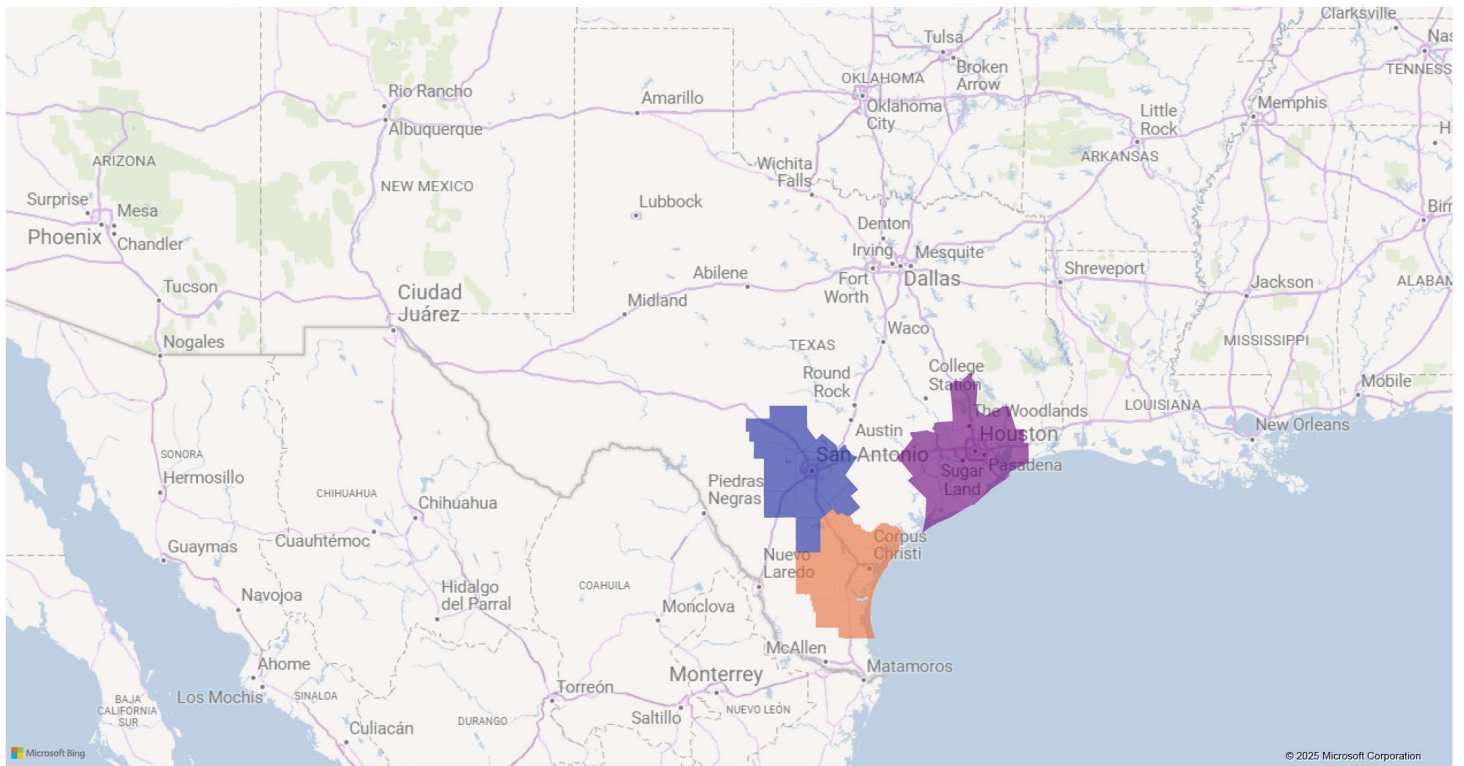

- Dallas:** Yellow area, showing high population density.
- Houston:** Red area, showing high population density.
- San Antonio:** Dark blue area, showing high population density.
- Austin:** Purple area, showing high population density.
- Fort Worth:** Light blue area, showing high population density.
- Abilene:** Light blue area, showing high population density.
- Midland:** Green area, showing high population density.
- El Paso:** Orange area, showing high population density.
- Phoenix:** Green area, showing high population density.
- Los Angeles:** Pink area, showing high population density.

The map also shows the surrounding states and major cities, including Arizona, New Mexico, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Georgia, Florida, and California. Major cities like Phoenix, Tucson, Albuquerque, Amarillo, Lubbock, Wichita Falls, Denton, Irving, Mesquite, Shreveport, Jackson, Mobile, New Orleans, Houston, Pasadena, Sugar Land, The Woodlands, Austin, Round Rock, Waco, Fort Worth, Dallas, San Antonio, Corpus Christi, McAllen, Matamoros, Monterrey, Saltillo, Torreon, Durango, Culiacan, Ahome, Navojoa, Guaymas, Hermosillo, Chihuahua, Cuauhtémoc, Hidalgo del Parral, Monclova, Piedras Negras, Nuevo Laredo, and San Antonio are labeled. The map is sourced from Microsoft Bing and is dated 2025.

## Conclusion and Recommendations

When measured in the context of numbers of active apprenticeship programs and apprentices within the state's fastest growing industries, Texas appears to be well poised to respond to future labor market demands through the apprenticeship model. The success of established apprenticeship models underscores their proven effectiveness in cultivating skilled talent pipelines. Industries within the Specialty Trade Contractors subsector, for example, have a long history of using the apprenticeship training model to create and maintain worker pipelines that ensure a consistent supply of highly skilled employees. The continued adoption of apprenticeships in non-traditional sectors such as Education highlights a growing recognition of the "earn while you learn" model's value in addressing acute labor shortages and fostering long-term career pathways.

Efforts to build upon the success of existing apprenticeship initiatives and leverage the apprenticeship model as a comprehensive workforce solution for non-traditional industry sectors should continue.

The TWC is committed to supporting apprenticeship programs across the state through a variety of initiatives. The demonstrated benefits and consistent cost-effectiveness of apprenticeship programs, including Apprenticeship Expansion, the Critical Skills Initiative (targeting "middle-skills" occupations), the Health Care Apprenticeship Initiative, the Texas Industry-Recognized Apprenticeships (TIRA) Grant Program, Pre-Apprenticeship Pathways, and the Apprenticeship Tax Refund Pilot Program offer significant value for Texas employers. By leveraging TWC resources, employers can develop a highly skilled workforce while minimizing training costs.

TWC assists employers in establishing and expanding apprenticeship programs with funding often accessed through competitive grant processes or awarded on a first-come, first-served basis. These TWC-supported programs provide apprentices with paid workplace experience, portable industry credentials, and competitive salaries upon completion, contributing to a stronger Texas workforce and economy.

Recommendations for work in the expansion of apprenticeship programs to meet the employment needs of emerging and high-demand industries include the following:

1. Continue outreach and engagement to promote and support work-based learning models, including the apprenticeship training model.
2. Collaborate extensively with employers and other stakeholders to address training needs and create or expand apprenticeship opportunities within emerging and high-demand industries.
3. Increase access to pre-apprenticeship and youth apprenticeship programs, allowing high school students to begin apprenticeship training while still in school. Partner with school districts and community colleges to integrate apprenticeship pathways into career and technical education (CTE) programs, providing students with valuable work experience and a head start on their careers.
4. Continuously monitor industry trends, identify emerging skills gaps, and inform the development of new apprenticeship programs that align with workforce needs.
5. Analyze the geographic distribution of apprenticeship programs and identify areas with limited access to apprenticeship opportunities. Prioritize the development of apprenticeship programs in rural areas to ensure widespread access to training and employment opportunities. Encourage the use of technology and online learning resources to expand access to apprenticeship training in rural areas.

TWC will continue to work with new and existing apprenticeship programs to promote growth and innovation and to ensure successful, sustainable apprenticeship models that meet the state's labor market needs.
