IV.	Methodology	93

I. Introduction

Texas Labor Code, Chapter 302, Subchapter A, Section 302.019 requires the Texas Workforce Commission (TWC) to gather and study information relating to existing and projected shortages in high-wage, high-demand occupations in this state on an annual basis in selected industries. This was established in House Bill 2478 of the 83rd Texas Legislature, Regular Session.

Data included in this report was the most recent data available as of the end of fiscal year 2025. Thus, Quarterly Census of Employment and Wages (QCEW) data covers the period through the first quarter of 2025. The Current Employment Statistics (CES) data covers the period through the August 2025 estimates.

This report also considers TWC's latest projections for employment growth for Texas, released in July 2024 with a base year of 2022 and covering the period of 2022 to 2032. Industry projection models weigh long-term industry trends dating back to 1990. The next employment projections, covering the period of 2024 to 2034, will be released in Summer 2026.

Since no official definition of a high-wage occupation exists, for purposes of this report, TWC focuses on growing occupations that pay more than the Texas median annual wage of \$47,499, according to Texas' annual Occupational Employment and Wage Statistics (OEWS) in 2024.

For each list of occupations by industry, a table is provided to show annual average employment in the base and end years, the difference in jobs between the two, the growth in percentage, the 2024 industry median annual wage, and the location quotient (LQ) which is a measure of occupational concentration versus the national level.

To segment Texas occupations by sector, TWC follows statistical data standards set by the agency's contracts with the U.S. Bureau of Labor Statistics and the Employment and Training Administration division of the U.S. Department of Labor. TWC examined nearly 800 occupations in Texas in making the occupational projections and segmenting those occupations for specific industries. Those growth occupations within industries are listed by industry sector in Section II.

II. Growth Occupations by Industry

Texas achieved new record employment highs 41 times in the 47 months from October 2021 through August 2025 based on establishment survey estimates, reaching a level of over 14.3 million positions. Residential survey estimates indicated that the state's civilian labor force set new record highs in 54 of the 58 months from October 2020 through August 2025 to reach a level of nearly 15.9 million Texans. The expanding economy in Texas continues to demand workers. That increased demand for labor is focused on key occupations where local supply has at times struggled to keep up with demand.

Predicting the occupations most in demand in an evolving labor market is part of the mission of TWC. While this report shows the most in-demand occupations in Texas for the 2022 through 2032 period, it is important to remember that each employer needs a unique combination of technical skills, education, work experience, and even soft skills for each of these jobs at each of their workplaces.

This section identifies occupations within major industries as defined in Texas Labor Code Section 302.019. Industries are categorized by the North American Industry Classification System (NAICS) with charts displaying staffing and wage information for a specific occupation within these major industries. Each industry listed in this report includes only occupations with wages above the Texas median annual wage and a projected employment increase of 400 or more jobs. These *high-wage, high-demand occupations* are then identified throughout this document to aid policy makers.

Overall, high-wage high-demand occupations are expected to grow by 707,200 jobs by 2032. These professions are not equally dispersed across industries, with Professional, Scientific, and Technical Services having the most occupations with 77, followed by Health Care and Social Assistance with 44. Of those industries having less than 10 qualifying occupations, Retail Trade, Accommodation and Food Services, and Utilities combined for 14. Despite its importance to the Texas economy, Agriculture, Forestry, Fishing and Hunting did not have any occupations meet high-wage high-demand criteria.

In terms of pay, the Health Care and Social Assistance industry has the top two highest paying professions of Family Medicine Physicians and Nurse Anesthetists. Computer and Information Systems Managers appear four times in the top ten highest paid occupation list representing the Manufacturing; Finance and Insurance; Wholesale Trade; and Professional, Scientific, and Technical Services industries.

Overall, high-wage, high-demand occupations are diverse in terms of educational requirements for entry. These can vary greatly between industries, with some industries dominated by occupations requiring distinct educational awards. In terms of entry being high school diploma or equivalent, the Construction industry is dominated by this award with 73.1 percent of occupations (19 total) requiring this credential while making up 70.0 percent of the 52,436 jobs to be added by 2032. In terms of four-year degrees, 83.3 percent of occupations in the Finance and Insurance industry require at least a bachelor's degree and heavily dominate throughout representing 92.0 percent of the 54,224 jobs being added in the future.

74 The fast-growing Health Care and Social Assistance industry offers more balanced
75 requirements for entry with bachelor's degree and above requirements, but this
76 industry also has the most high-wage, high-demand professions that require an
77 associate's degree of any industry. Eight occupations require such an award
78 representing 18.2 percent of occupations and 12.5 percent of jobs or 15,048 added in
79 the future.

80

A. Construction

For the first quarter of 2025, Construction industry employment peaked as the industry added business locations for every first quarter of the last twelve years.

During the first quarter of 2025, QCEW reported Construction employment reached 912,923 jobs in Texas. First quarter 2025 comparisons of average employment to previous years shows an increase of 4.8 percent over one year and an increase of 30.3 percent over ten years. Based on first quarter 2025 QCEW, Construction holds 6.5 percent of total employment in Texas.

According to CES, Texas' Construction industry seasonally adjusted employment has increased by 27.4 percent since August 2015, adding 188,600 positions to reach 877,700 in August 2025, just shy of the series high of 879,000 reached a few months prior in May 2025. The industry has experienced over-the-year employment growth for 53 consecutive months beginning April 2021.

As of 2024, OEWS lists 339 unique occupations in this industry, with 44.5 percent of these occupations paying a wage greater than the Texas annual median wage of \$47,499.

The not seasonally adjusted Producer Price Index measuring net input costs for goods in the construction industries increased over the year in August 2025, marking 10 consecutive months of over-the-year increases.

The unadjusted U.S. September-August fiscal year monthly average for building permits peaked in 2005 with nearly 178,000 housing unit permits authorized nationally per month. In fiscal year 2025, an average of 118,400 housing permits were authorized monthly, ranking sixteenth in series history dating back to 1988. In Texas, new housing units remained steady and historically elevated in fiscal year 2025 as the September-August building permit monthly average ranked fifth in series history at roughly 18,150 permits issued per month. Texas led all states in calendar year 2024 with over 225,000 privately owned housing unit permits issued.

Similarly, labor demand in Texas' Construction industry as measured by Help Wanted OnLine job ad postings peaked four years ago with an average of roughly 17,600 job ads per month in fiscal year 2021. An average of about 16,900 job ads per month were recorded in fiscal year 2025, an increase of 6.8 percent from the previous fiscal year.

The Texas Workforce Commission projects an average 1.0 percent increase in construction employment each year between 2022 to 2032. This equates to an increase of 81,976 jobs, or a 10.7 percent growth over the ten-year period. The largest gain in employment among Construction's subsectors is an expected 47,042 jobs within the Specialty Trade Contractors industry.

118 Listed below are occupations that pay above the state annual median wage of \$47,499
 119 and are projected to add at least 400 jobs from 2022 to 2032.

120 **Table 1. Employment Characteristics of High-Wage, High-Demand**
 121 **Occupations in Construction (descending by number change)**

Occupation Title	Annual Average Employment 2022	Annual Average Employment 2032	Number Change 2022- 2032	Percent Change 2022- 2032	2024 OEWS Annual Median Wage	LQ
Electricians	47,821	57,543	9,722	20.3	\$51,995	1.08

Below are the educational and training requirements for high-wage, high-demand occupations in this industry. Apprenticeable occupations are designated with a superscripted letter "A". These occupations are approved for apprenticeship by the United States Department of Labor Office of Apprenticeship.

Table 2. Education, Training, and Experience Requirements for High-Wage, High-Demand Occupations in Construction

Occupation	Education	Training	Experience	STEM
Electricians ^A	High school diploma or equivalent	Apprenticeship	None	No
First-Line Supervisors of Construction Trades and Extraction Workers	High school diploma or equivalent	None	5 years or more	No
Heating, Air Conditioning, and Refrigeration Mechanics and Installers ^A	Postsecondary nondegree award	Long-term on-the-job training	None	No
Plumbers, Pipefitters, and Steamfitters ^A	High school diploma or equivalent	Apprenticeship	None	No
Operating Engineers and Other Construction Equipment Operators ^A	High school diploma or equivalent	Moderate-term on-the-job training	None	No
Construction Managers	Bachelor's degree	Moderate-term on-the-job training	None	No
General and Operations Managers ^A	Bachelor's degree	None	5 years or more	No
Heavy and Tractor-Trailer Truck Drivers ^A	Postsecondary nondegree award	Short-term on-the-job training	None	No
Carpenters ^A	High school diploma or equivalent	Apprenticeship	None	No
Project Management Specialists ^A	Bachelor's degree	None	None	No

Occupation	Education	Training	Experience	STEM
Telecommunications Line Installers and Repairers ^A	High school diploma or equivalent	Long-term on-the-job training	None	No
Welders, Cutters, Solderers, and Brazers ^A	High school diploma or equivalent	Moderate-term on-the-job training	None	No
First-Line Supervisors of Mechanics, Installers, and Repairers ^A	High school diploma or equivalent	None	Less than 5 years	No
Electrical Power-Line Installers and Repairers ^A	High school diploma or equivalent	Long-term on-the-job training	None	No
Occupational Health and Safety Specialists ^A	Bachelor's degree	None	None	No
Mobile Heavy Equipment Mechanics, Except Engines ^A	High school diploma or equivalent	Long-term on-the-job training	None	No
Solar Photovoltaic Installers	High school diploma or equivalent	Moderate-term on-the-job training	None	No
Sales Representatives of Services, Except Advertising, Insurance, Financial Services, and Travel	High school diploma or equivalent	Moderate-term on-the-job training	None	No
Crane and Tower Operators ^A	High school diploma or equivalent	Moderate-term on-the-job training	Less than 5 years	No
Structural Iron and Steel Workers ^A	High school diploma or equivalent	Apprenticeship	None	No
Excavating and Loading Machine and Dragline Operators, Surface Mining ^A	High school diploma or equivalent	Moderate-term on-the-job training	Less than 5 years	No
Accountants and Auditors ^A	Bachelor's degree	None	None	No

Occupation	Education	Training	Experience	STEM
Insulation Workers, Mechanical ^A	High school diploma or equivalent	Apprenticeship	None	No
Sheet Metal Workers ^A	High school diploma or equivalent	Apprenticeship	None	No
Maintenance and Repair Workers, General ^A	High school diploma or equivalent	Moderate-term on-the-job training	None	No
Reinforcing Iron and Rebar Workers ^A	High school diploma or equivalent	Apprenticeship	None	No

B. Manufacturing

According to seasonally adjusted CES data, from August 2015 to August 2025 manufacturing employment in Texas rose by 93,300 jobs for a 10.7 percent overall increase which accounted for more than one of every four manufacturing jobs gained in all 50 states and the District of Columbia. Durable goods manufacturing employment in Texas grew over that span by 44,300 for a 7.7 percent increase which equaled more than nine of every ten such positions added in the U.S. Texas added 49,000 jobs in nondurable goods manufacturing for 16.3 percent expansion and nearly one of every five among all states and DC.

The manufacturing job count in Texas is the second largest in the United States even though it is at the lowest level since December 2023. The industry numbered 967,700 positions as of August 2025.

Hours and Earnings data indicates demand for these jobs remains strong. Manufacturing production worker average hourly earnings have grown by 32.6 percent over the last five years. It reached \$31.16 in August after setting a series high at \$31.71 in January. Durable Goods positions reported \$32.83 per hour, having peaked at \$33.70 in March. Non-Durable Goods positions registered \$28.67 per hour, having peaked at \$28.99 in January.

Twenty-nine occupations in the Manufacturing industry meet the high-wage, high-demand criteria. These occupations are expected to account for 59.9 percent of the industry's projected growth with an addition of 34,521 jobs. Those occupations requiring at least a bachelor's degree are expected to add 16,865 jobs. The occupation meeting the high-wage and high-demand criteria projected to grow the fastest from 2022 to 2032 is Industrial Machinery Mechanics at 33.5 percent. The growth occupation with the highest median annual salary is Computer and Information Systems Managers which pays \$173,692, followed closely by Architectural and Engineering Managers with a salary of \$170,964.

Listed below are occupations that pay above the state annual median wage of \$47,499 and are projected to add at least 400 jobs from 2022 to 2032.

Table 4. Employment Characteristics of High-Wage, High-Demand Occupations in Manufacturing (descending by number change)

Occupation Title	Annual Average Employment 2022	Annual Average Employment 2032	Number Change 2022-2032	Percent Change 2022-2032	2024 OEWS Annual Median Wage	LQ
Industrial Machinery Mechanics	15,136	20,201	5,065	33.5	\$63,088	1.51

Occupation Title	Annual Average Employment 2022	Annual Average Employment 2032	Number Change 2022-2032	Percent Change 2022-2032	2024 OEWS Annual Median Wage	LQ
First-Line Supervisors of Production and Operating Workers	39,617	42,798	3,181	8.0	\$66,560	0.96
Software Developers	11,443	14,053	2,610	22.8	\$130,164	1.02

184

C. Agriculture and Forestry

In the last five years, demand for Agriculture and Forestry workers remained relatively stagnant, according to the QCEW data. In the first quarter of 2025, the number of workers in jobs covered by unemployment insurance with Agriculture and Forestry employers in Texas was 59,394, up 3.0 percent from the same quarter in 2015 (when there were 57,680 jobs in that industry covered by unemployment insurance).

Traditional labor market information may not completely capture the agriculture sector, since many Bureau of Labor Statistics programs are non-agricultural and a significant amount of agricultural labor is not covered by the unemployment tax system. None of the occupations in this industry are projected to grow more than 400 jobs in the TWC 2022 to 2032 labor market projections. Therefore, no occupations met the criteria required for inclusion in this report (paying above the state median wage of \$47,499 and growing at or above 400 jobs in the most recent TWC long-term labor market projection). This lack of occupations meeting the criteria is due to both the federal rules for collecting the data referenced above and the current economic conditions in the industry.

Data from outside the Labor Market Information system shows that agriculture is both a major contributor of jobs and economic output for Texas, but the wage structure of the industry does not lend itself to the criteria examined for this specific report. According to the Farm Labor Survey from the National Agricultural Statistical Service, there were an average of 54,500 field and livestock workers employed in the Southern Plains Region (Texas and Oklahoma) during the four quarters of Calendar Year 2024. These workers made an average wage of \$15.82 per hour. This hourly wage is below the Texas median hourly wage of \$22.84 (the criteria of a job for inclusion in this report). The Farm Labor Survey does not disaggregate regionally by Standard Occupational Classification.

According to the Bureau of Economic Analysis, the Agriculture, forestry, fishing and hunting industry contributed \$17.5 billion to gross state product in Calendar Year 2024. The National Agriculture Statistical Service estimates total farm production expenditures of \$26.5 billion in Calendar Year 2024. Of that amount, labor accounted for \$1.95 billion in farm production expenditures.

The table below lists top certifications within HWOL job advertisements for this sector.

Table 7. In-Demand Certifications for Agriculture and Forestry Occupations

Skill or Qualification	Aug 2019 Unique Postings	Aug 2024 Unique Postings	Aug 2025 Unique Postings

D. Health Care and Social Assistance

Healthcare and Social Assistance is expected to grow over 17 percent by the year 2032. This would put total employment in this industry up over 1.9 million an increase of over 290,000 jobs when compared to the year 2022. Registered nurses make up the largest occupation by employment in this industry and has a projected employment of over 227,000 by 2032 an increase of 14.8 percent.

The subsector of Health Care and Social Assistance projected to add the most jobs from 2022 to 2032 is Ambulatory Health Care Services which is projected to add over 147K jobs accounting for over 50 percent of all jobs projected to be created in the Health Care and Social Assistance industry. The projected number change from 2022 to 2032 for each industry subsector is shown in the chart below.

Chart 1: Health Care and Social Assistance Industry Subsectors Projected Employment Change from 2022 to 2032

Source: Industry Projections 2022 to 2032, NAICS 62.

According to CES Seasonally Adjusted data August 2025 total employment is currently over 1.7 million for the Health Care and Social Assistance industry. Certain occupations in the healthcare industry are still struggling to meet demand. Registered Nurses for example still have shortages of available employees to meet current demand in the workforce.

The Health Care and Social Assistance industry has become one of the dominant industries for employment in Texas – and the United States – in the last decade. Demand for health care workers in Texas is expected to continue to increase as the state has growing populations of both old and young people, who are the primary

customers of the Health Care and Social Assistance industry. This demand is highlighted by the fact that this industry is projected to add the most jobs from 2022 to 2032 of all industry sectors.

According to QCEW Q1 data Healthcare and Social Assistance has added over 30,000 establishments from 2015 to 2025. Along with the Average Weekly Wage increasing from \$871 to \$1,272 over this same period. This sector is faced with training challenges as employers are demanding higher educated workers due to market demands and industry expectations.

Of the 44 high-wage, high-demand occupations in this industry, 65.9 percent require at least a bachelor's degree.

Listed below are occupations that pay above the state annual median wage of \$47,499 and are projected to add at least 400 jobs from 2022 to 2032.

274

E. Educational Services

In the first quarter of 2025, employment in Educational Services in Texas was about 1.3 million, representing nearly 9.6 percent of the state's total. Compared to the first quarter of 2015, employment in this sector has risen by 16.2 percent, adding 187,598 jobs.

Seasonally adjusted CES data for private employers in this industry shows strong ten-year growth adding 56,000 jobs (29.6 percent), despite a slight decrease of 100 jobs in the year ending August 2025. Peak over the year growth occurred in April 2021 at 12.5 percent, with 23,800 jobs added.

In August 2025, the Help Wanted OnLine program recorded 28,827 unique job postings in the Education Services industry, with Postsecondary Teachers (88,184), Secondary School Teachers, Except Special and Career/Technical Education (81,621), and Teaching Assistants, Except Postsecondary (43,790) being the most frequently advertised occupations over the past decade.

The Education Services industry is projected to grow by 11.4 percent by 2032, adding 150,232 jobs. Out of 288 occupations in this industry, 70.5 percent (203 occupations) offer wages above the Texas median. Among these, 40 occupations are projected to add more than 400 jobs each by 2032, collectively contributing 76,675 jobs and accounting for over 51.0 percent of the industry's anticipated growth. The occupations that are concentrated relatively higher in Texas than in the nation are *Career/Technical Education Teachers, Secondary School*; and *Special Education Teachers, Kindergarten and Elementary School*; with LQ of 2.63 and 1.97 respectively.

The Elementary School Teachers, Except Special Education occupation has the largest projected job gain from 2022 to 2032 with a projected growth of 17,013 jobs. *Secondary School Teachers, Except Special and Career/Technical Education* are projected to add 13,150 positions but no others are projected to add more than 10,000. Overall, *Medical and Health Services Managers* are expected to grow the fastest at 32.0 percent. By 2032, this occupation is projected to grow by 532 jobs within the Colleges, Universities, and Professional Schools industry, representing a substantial increase of 31.4 percent. *Software Developers* follows at 26.3 percent with *Health Specialties Teachers, Postsecondary* growing at 25.0 percent.

There is a mix of educational and training requirements associated with the 40 occupations listed in Table 11. 60.0 percent (24 of 40 occupations) require no more than a bachelor's degree, 87.5 percent of the jobs require none to less than 5 years of experience, and only 2 occupations needing moderate-term on-the-job or internship/residency training. The highest paying occupations in Educational Services include *Engineering Teachers, Postsecondary*; *Computer and Information Systems Managers*; *Financial Managers*; as well as *Health Specialties Teachers, Postsecondary* each have annual median wages exceeding \$120,000.

315 Listed below are occupations that pay above the state annual median wage of \$47,499
 316 and are projected to add at least 400 jobs from 2022 to 2032.

F. Transportation and Warehousing

In the past decade, demand for Transportation and Warehousing workers in Texas has increased significantly according to QCEW. This data is for NAICS codes 48-49.

In the first quarter of 2025 average employment in the Transportation and Warehousing industry in Texas was 705,834, up 44.9 percent from the same quarter in 2015. Transportation and Warehousing employment expanded from 4.2 percent of total employment to 5.0 percent over that period. Average weekly wages in the industry also grew over the decade, increasing by nearly \$370 to reach \$1,568 in the first quarter of 2025.

Not seasonally adjusted Current Employment Statistics indicate that the sector grew by 1.2 percent (7,900 jobs) over-the-year to reach 647,600 positions as of August 2025. Transportation and Warehousing employment has risen by 40.8 percent (187,700 positions) since August 2015, an average annual growth rate over that period of 3.5 percent. The annual growth rate for the sector reached a series peak of 12.0 percent in April 2022.

According to the United States Census Bureau's Retail Trade Survey, seasonally adjusted e-commerce sales made up 16.3 percent of total retail sales in the second quarter of 2025, compared to 7.0 percent a decade earlier. Quarterly retail sales in e-commerce have increased for 18 of the past 20 quarters, including a series-high quarterly increase of 32.6 percent during the second quarter of 2020 in response to quarantines due to the COVID-19 pandemic.

Industry job numbers will likely remain robust as the prevalence of e-commerce warehousing and deliveries continues to expand and the state continues to invest in transportation infrastructure. Long term projections indicate that Transportation and Warehousing employment is expected to increase to approximately 833,562 positions by 2032. From 2022 to 2032 the Transportation and Warehousing industry is projected to grow by 25.2 percent based on 167,600 jobs added. Heavy and Tractor-Trailer Truck Drivers are projected to make the largest occupational gains through 2032 to reach an estimated employment of 143,802 jobs.

365 Listed below are occupations that pay above the state annual median wage of \$47,499
 366 and are projected to add at least 400 jobs from 2022 to 2032.

389

G. Mining, Quarrying, and Oil and Gas Extraction

In the past ten years, demand for Mining, Quarrying, and Oil and Gas Extraction industry workers in Texas has varied year-to-year, based on data for NAICS code 21 from QCEW. Compared to the first quarter of 2015, average employment in the industry during the same quarter of 2025 has declined by 29.2 percent while the number of firms in the industry decreased by 19.8 percent during the same period. The Mining, Quarrying, and Oil and Gas Extraction industry made up 2.6 percent of all jobs across the state ten years ago, but most recently published QCEW data reveals that number declined by 1.1 percentage points to 1.5 percent in the first quarter of 2025. A similar trend is seen in the share of firms within the industry – Mining, Quarrying, and Oil and Gas Extraction companies comprised of 1.7 percent of all firms in the state during the first quarter of 2015; the latest first-quarter numbers indicate that value is now 1.0 percent.

Since 2015, first-quarter average employment in the industry compared to the previous year dropped the most in 2021 by 25.5 percent, followed by 22.0 percent in 2016. Additionally, data from the CES program indicates the not seasonally adjusted number of positions in the industry reached its ten-year August low of 169,500 in 2020, which was a 31.7 percent decrease from 2019.

However, in the past decade, QCEW first-quarter numbers have grown during some years as the average number of jobs in the industry has increased the most over-the-year during 2018 by 11.3 percent, followed by 11.2 percent in 2023 and 9.5 percent in 2022. CES also show job counts have grown annually in recent years, reaching a ten-year high at 12.3 percent in August 2022 but slowing to 5.6 percent in August the following year, 1.4 percent in 2024, and 1.3 percent in August 2025.

The total number of jobs in the industry across all occupations is expected to increase to 214,686 in 2032 from 191,413 in 2022. High-wage, high-demand occupations represent 9.6 percent of detail occupations in Mining, Quarrying, and Oil and Gas Extraction.

420 Listed below are occupations that pay above the state annual median wage of \$47,499
 421 and are projected to add at least 400 jobs from 2022 to 2032.

422 **Table 17. Employment Characteristics of High-Wage, High-Demand**

425 Source: Occupational Projections 2022 to 2032, NAICS 21. Occupational Employment and
426 Wage Statistics 2024.

427 There is a mix of educational and training requirements associated with the top
428 occupations in Mining, Quarrying, and Oil and Gas Extraction. Of the nine occupations
429 in this industry highlighted within the report, three require a Bachelor's degree with
430 zero training nor experience needed except for General and Operations Managers,
431 where 5 or more years of experience is a must. For positions where no formal
432 education credential is a requisite, a mix of short- and moderate-term on-the-job
433 training is mandatory with no experience needed. Heavy and Tractor-Trailer Truck
434 Drivers is the only occupation featured that requires a Postsecondary nondegree
435 award, with short-term on-the-job training needed.

436 Below are the educational and training requirements for high-wage, high-demand
437 occupations in this industry. Apprenticeable occupations are designated with a
438 superscripted letter "A". These occupations are approved for apprenticeship by the
439 United States Department of Labor Office of Apprenticeship.

440 **Table 18. Education, Training, and Experience Requirements for High-Wage,**

The following table lists the top five certifications within HWOL job advertisements for this industry's nine high-growth, high-demand occupations. For example, in August 2025, 36.0 percent of job ads for the top high-growth, high-demand occupations in Texas called for applicants to possess a Commercial Driver's License (CDL), compared to 48.2 percent in August 2024 and 34.8 percent in August 2019. Having a valid Driver's License comes behind a CDL as this qualification appeared in 24.0 percent of job ads for the above-mentioned occupations as of August 2025

Table 19. In-Demand Certifications for High-Wage, High-Demand Occupations in Mining, Quarrying, and Oil and Gas Extraction

Certification	August 2019	August 2024	August 2025
Commercial Driver's License (CDL)	34.8%	48.2%	36.0%
Valid Driver's License	28.5%	23.2%	24.0%

453 **H. Utilities**

454 According to QCEW, employment in the Utilities industry has continued to grow,
455 recording an increase in employment for 19 consecutive quarters dating back to the
456 third quarter of 2020. In the first quarter of 2025, the number of workers employed in
457 the Utilities industry reached a series high of 102,621, adding 22,756 employees—a
458 28.5 percent increase—since the first quarter of 2015. Of the 102,621 employees in
459 the Utilities industry, 34.1 percent, or 34,950, are public-sector workers who are
460 employed by local government, while the remaining 65.9 percent, or 67,671, are
461 employed in the private sector.

462 When looking at not seasonally adjusted CES data the industry shows a 39.2 percent
463 increase in private-sector Utilities jobs in the last ten years ending August 2025, as
464 private-sector employment sits at a series high of 68,500. This number is comparable
465 to the private-sector employment number in QCEW as public-sector workers in any
466 industry are counted under Government employment in CES, one of the key
467 distinctions between the QCEW and CES programs.

468 Annual median wages for detail occupations in the Utilities industry range from
469 \$31,260 to \$217,899, with 89.0 percent of occupations paying a wage greater than
470 the state annual median of \$47,499. Just over half of these occupations have a typical
471 education level of an Associate's degree or less.

472 The Utilities industry is projected to add 4,321 jobs from 2022 through 2032,
473 increasing employment in the industry by 7.9 percent. As of 2022, 41.7 percent of
474 detail occupations (for which projections data are available) in the industry have a
475 typical worker education level of Bachelor's degree, however these occupations
476 employ only 26.8 percent of detail occupation workers in the industry; 38.1 percent of
477 detail occupations have a typical education level of High School Diploma or Equivalent,
478 but these occupations employ 63.2 percent of detail occupation workers in the
479 industry.

480 Listed below is the occupation that pays above the state annual median wage of
481 \$47,499 and is projected to add at least 400 jobs from 2022-2032. Although only one
482 occupation meets these criteria, this is not indicative of an industry in decline or
483 lacking in growth, but rather a function of the criteria and low base employment in the
484 industry. In 2022, fewer than 2,000 people were employed in 79 of 84 detail
485 occupations, so an increase of at least 400 jobs would have required an extremely
486 high growth rate for most of these occupations.

504

I. Wholesale Trade

In the last five years, demand for Wholesale Trade industry workers in Texas rose, according to QCEW. Employment grew on average by almost 1,900 jobs over the last ten years or 15.5 percent. The industry is showing 6.6 percent growth in the last five years and 0.1 percent over the last year.

Wholesale Trade firms, establishments, and employment represent a slightly smaller portion of Texas' diverse industry composition compared to five years ago, which is due to the rapid growth in other industries taking a larger share. The industry share of employment fell 0.5 percentage point to 5.5 percent in the last 10 years contributing 651,725 positions of the 11.9 million private employment. Wages remain timely as the average weekly wage increased each of the last five years and increased \$25.54 per quarter from 2020 first quarter to the same quarter of 2025.

Among high-wage, high-demand occupations, *Industrial Machinery Mechanics*; *Software Developers*; *Computer and Information Systems Managers*; are STEM occupations with significant demand, employing a collective total of more than 14,000 workers as of 2022. These occupations pay substantially more than the 2024 Texas median average wage and are expected to grow by over 27.0 percent each by 2032. Overall, 65.6 percent (21 of 32 professions) of high-demand occupations in Wholesale Trade having greater employment concentrations than the nation.

In the first quarter of 2025, the number of workers with Wholesale Trade employers in Texas was 651,725, up 6.6 percent from the same quarter in 2020.

A histogram of the Median Annual Wages for the Wholesale Trade industry is below.

528 **Chart 2: Number of Wholesale Trade Occupations by Statewide Median Wage**
529 **Ranges**

530
531 Source: Occupational Employment and Wage Statistics 2024

532 This histogram is right-skewed meaning that while most occupations cluster around
533 lower to mid-range wages, a small number of high-paying roles stretch the
534 distribution far to the right. That long tail represents higher paid occupations such as
535 Chief Executives, Lawyers, Insurance Sales Agents.

536 As of 2022, the 32 high-wage, high-demand occupations in the Wholesale Trade
537 employed 286,002 people and are expected to grow another 49,546 by 2032.

538

539 Listed below are occupations that pay above the state annual median wage of \$47,499
 540 and are projected to add at least 400 jobs from 2022 to 2032.

561

562 **J. Retail Trade**

563 In the last ten years, demand for Retail Trade workers in Texas has experienced slow
564 and steady growth, according to QCEW. From first quarter 2015 to first quarter 2025,
565 the number of establishments for NAICS code 44-45 increased by 12.4 percent, a
566 modest increase when compared to 34.1 percent for Total, All Industries. Firms in
567 Retail Trade experienced more favorable growth during this period, 14.6 percent over
568 the same period when compared to 34.0 percent growth of all industries. Average
569 Employment data shows a slower growth in Retail Trade at 9.9 percent when
570 compared to Total, All Industries at 21.4 percent, which experienced over double the
571 rate for the same period. Average Weekly Wage data indicates closer parity between
572 growth in Retail and Total, All Industries over the last 10 years. Average Weekly
573 Wages grew by 49.3 percent in retail trade, outpacing total, all industries' growth of
574 45.7 percent.

575 Seasonally adjusted CES data also indicates growth in the Retail Industry. Like the
576 unadjusted QCEW data set, the ten-year employment growth for retail trade lags
577 behind that of total industries. From August 2015 to 2025, Retail jobs growth was 9.9
578 percent, compared to that of Total Nonfarm's 20.5 percent. Remarkably, Retail Trade
579 jobs in Texas are outpacing national growth in the industry, which is nearly identical
580 to its 2015 levels with a change of 0.0 percent. Recently, Retail Trade jobs hit a series
581 high of 1,429,200 jobs in July 2025 going back to 1990. Although not growing as
582 aggressively as other industries, Retail Trade growth continues its slow and steady
583 pace.

584 Retail Trade occupations make up 7.9 percent of all occupations according to our 2024
585 OEWS data. In 2024, the Median Wage for Texans was \$47,499. The percentage of
586 Retail Trade occupations that offered wages higher than the median was 43.3 percent,
587 a significantly lower percentage when compared to 64.9 percent for all industries.
588 When looking at education levels of Retail Trade occupations that offer wages above
589 the median, 52.9 percent required an Associate's degree or higher compared to 47.1
590 percent which did not require any college degree.

591 According to our Projections data, employment in Retail Trade is estimated to grow to
592 1,477,022, a 12.2 percent increase over 10 years.

593

594 Listed below are occupations that pay above the state annual median wage of \$47,499
595 and are projected to add at least 400 jobs from 2022 to 2032.

K. Finance and Insurance

In the last decade, demand for Finance and Insurance industry workers in Texas rose, according to QCEW. This data is for NAICS code 52.

In the first quarter of 2025, the number of workers in this industry was 658,707, up 2.2 percent from the same quarter in 2024, an increase of 13,876 workers. This continues the positive trend where employment has increased by 31.8 percent, or 158,828 workers, since first-quarter 2015. The Finance and Insurance industry represents approximately 4.7 percent of all employment in Texas as of first-quarter 2025, increasing from 4.3 percent in the same quarter of 2015.

In addition to increased employment, the average weekly wage (AWW) for this industry has also increased from \$2,858 to \$3,034 from first-quarter 2024 to first-quarter 2025. In first-quarter 2024, this average weekly wage was 85.7 percent higher than the average weekly wage across all industries in Texas, and in first-quarter 2025, this has increased to 91.2 percent, or a difference of \$1,447 in AWW. Similar to the growth in employment, the increase in average weekly wages for the Finance and Insurance industry has been consistent over the past decade, where in first-quarter 2015 the average weekly wage was 78.0 percent higher than the average weekly wage across all industries in Texas. This increase in both wages and employment shows clear growth and demand in Texas for this industry.

Listed below are occupations that pay above the state annual median wage of \$47,499 and are projected to add at least 400 jobs from 2022 to 2032.

SOURCE: Occupational Projections 2022-2032, NAICS 52. Occupational Employment and Wage Statistics 2024.

Of all the detail occupations in this industry, about 75.0 percent pay above the Texas median wage of \$47,499. 93.9 percent of the detail occupations in this industry have a positive projected growth from 2022 to 2032 and 57.3 percent of the occupations have a projected percent change of over 20.0 percent. Comparatively, all the occupations across all industries in Texas have a projected percent change of 14.7 percent from 2022 to 2032.

Regarding education requirements, 51.2 percent of the detail occupations in this industry require a bachelor's degree or higher, but 86.7 percent of the occupations that meet the high-growth high-demand criteria have this educational requirement. Out of all detail occupations in this industry, 9.8 percent are considered STEM, 54.9 percent are apprenticeable, and 34.1 percent are considered middle skill occupations.

Below are the educational and training requirements for high-wage, high-demand occupations in this industry. Apprenticeable occupations are designated with a superscripted letter "A". These occupations are approved for apprenticeship by the United States Department of Labor Office of Apprenticeship.

657 The table below lists the top five certifications for the 30 high-growth, high-demand
658 occupations in this sector based on the most frequently mentioned skills or
659 qualifications in job postings for the respective year. For example, in August 2025, the
660 top certification needed was FINRA Series 7 (General Securities Representative),
661 mentioned in 8.7 percent of postings, which is an increase from 7.8 percent in August
662 2024 and 6.8 percent in August 2019.

663 **Table 31. In-Demand Certifications for High-Wage, High-Demand Occupations**
664 **in Finance and Insurance**

Certification	August 2019	August 2024	August 2025
FINRA Series 7 (General Securities Representative)	6.8%	7.8%	8.7%
Master Of Business Administration (MBA)	10.3%	7.1%	8.4%
Certified Financial Planner	2.2%	3.2%	4.9%
Certified Information Systems Security Professional	4.8%	3.9%	4.9%
Certified Public Accountant	4.9%	4.9%	4.8%

L. Professional, Scientific, and Technical Services

Over the past ten years, the Professional, Scientific, and Technical Services industry experienced the fastest growing share of Texas employment. Comparing first quarter data from QCEW, the industry's employment share rose by 1.4 percentage points since 2015. This industry now accounts for 7.6 percent of total Texas employment, making it the fifth largest industry in Texas. During the first quarter of 2025, the industry also had the highest number of establishments and firms with 133,685 establishments and 119,062 firms. This data is for NAICS code 54.

In August 2025, employment in Professional, Scientific, and Technical Services came in at 1,071,800, following a series high in July 2025 of 1,072,500 jobs based on data from the CES program. The industry grew by 48.8 percent over the past ten years ending August 2025, over twice as fast as the increase for Texas total nonfarm jobs at 20.5 percent. Looking at data over the past year, the industry continues to outpace Texas total nonfarm job growth. The August employment level reflected a 2.2 percent increase from August 2024, while Texas total nonfarm jobs increased by 1.4 percent.

According to 2024 OEWS data, 79.7 percent of Professional, Scientific, and Technical Services industry occupations paid above the Texas median annual salary of \$47,499. This was a higher percentage compared to all industry occupations with 64.9 percent of Texas occupations paying above the median wage. At 51.6 percent, over half of occupations in this industry require a bachelor's degree or above compared to 37.6 percent of total industry occupations.

Texas employment for total occupations is expected to increase by 14.7 percent from 2022 to 2032. The growth for the Professional, Scientific, and Technical Services industry is expected to be over twice this rate with a projected employment increase of 32.2 percent, adding 288,294 jobs. Projections for this industry expect 96.9 percent of its occupations to experience employment growth through 2032 compared to 89.9 percent of all industry occupations.

695 Listed below are occupations that pay above the state annual median wage of \$47,499
 696 and are projected to add at least 400 jobs from 2022 to 2032.

M. Accommodation and Food Services

In the last decade, demand for Accommodation and Food Services workers in Texas has grown according to QCEW data for NAICS code 72. In the first quarter of 2025, the average number of workers at Accommodation and Food Services industry employers in Texas was over 1.334 million, up 24.2 percent from the same quarter in 2015 when over 1.074 million workers were employed. The average weekly wage for a worker in the industry increased by over 48 percent over that time period as well.

Employment growth in Accommodation and Food Services in Texas has slowed over the past year but remains steady. Seasonally adjusted CES data shows that Accommodation and Food Services employment reached a level of over 1.364 million jobs in August 2025. This marked a gain of 28,000 positions over the year for an annual growth rate of 2.1 percent. Over the three-year period dating to August 2022, the industry added 89,000 jobs for a growth rate of 7.0 percent over that period.

Of the 71 occupations reported in this industry, 78.9 percent have a typical education level not greater than an Associate's degree. All occupations in the industry have positive projected change from 2022 to 2032, and 38.0 percent of the occupations have a projected percent growth at or above 20.0 percent over that time period. Comparatively, all occupations across all industries in Texas collectively are projected to grow by 14.7 percent from 2022 to 2032.

Listed below are occupations that pay above the state annual median wage of \$47,499 and are projected to add at least 400 jobs from 2022 to 2032.

III. Conclusion

TWC reviewed the top growth occupations across the key industries for this report as required by statute. The state continued to experience job growth in recent years. According to the Bureau of Labor Statistics, total nonfarm employment has increased by 392,600 jobs (from 13.96 to 14.35 million) between August 2023 to August 2025, an increase of 2.8 percent (seasonally adjusted). As of the time of this report, there were 554,000 jobs openings in Texas in August 2025, compared with 515,000 people hired in the same month, according to the Bureau of Labor Statistics. Clearly, there are many available jobs for those Texans seeking employment, so much so that filling open positions remains a challenge for many Texas employers.

Because of this employment growth, job seekers continue to flock to Texas. Texas is expected to have one of the fastest growing job counts in the nation at 14.7 percent from 2022 to 2032 according to estimates compiled by the Projections Management Partnership. This increase would far outperform the overall expected increase for the nation of 3.7 percent over that period of time and would only be exceeded by Utah.

But those seeking employment, whether long-time or new Texans, may not always have the right skills for available openings. As this report demonstrates, the number of high-demand occupations with wages above the state median varies significantly by industry sector.

To assist the market, TWC tracks approximately 800 different occupations and employment is projected to increase in nearly all them based on the 2022 to 2032 projections. TWC's projections spreadsheet, and this report, mention the typical education, training and experience levels required in these occupations. Economic changes can impact employment in all industries in Texas. Demand across occupations varies depending on the needs of employers in different industries and locations.

Hiring managers are looking for more workers while also demanding workers with more technical skills, more work experience, and more education than in the past. Such trends directly result from rising demand for two kinds of jobs in high-wage, high-demand fields: a) Jobs requiring a bachelor's degree and specific technical skill training, and b) Jobs requiring some form of post-secondary education, specific technical skill training, and additional on-the-job training. Like the overall job market, these trends show no signs of slowing down in Texas.

By examining the market trends published in this report and other TWC data products, workforce professionals, job seekers, and educators can continue to improve the alignment between worker training and the needs of the rapidly growing Texas job market.

IV. Methodology

The Texas Workforce Commission (TWC) collects data and makes projections on employment by industry as part of its contracts with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Division of the U.S. Department of Labor (DOL). In accordance with the statistical methodology established by the DOL and the federal Office of Management and Budget, the TWC calculated employment data for approximately 800 occupations to analyze pay ranges and growth trends for these different occupations.

TWC measures many aspects of the Texas labor market. The number of workers employed, and wages paid by industry are tracked through the QCEW. This program utilizes data from TWC's Unemployment Insurance program and is updated every three months. Wage information for specific occupations is gathered from surveys sent to sampled employers in the Occupational Employment and Wage Statistics (OEWS) program, which updates annually.

Employers supply the data for both of these programs, and TWC analyzed the employment and wage data from both the QCEW and OEWS programs. This data is further supplemented by monthly employment data from the Current Employment Statistics (CES) program surveys of employers in Texas. All of these programs serve to validate each other in identifying staffing trends with employers.

TWC then examines the number of workers by industry as the basis for producing industry employment projections. TWC produces these industry employment projections and corresponding occupational employment projections to help job seekers, students, parents, policy makers, and company hiring managers better understand their regional labor market. Occupational employment growth is based on industry growth and other variables, which include population growth and changing skill requirements by employers.

The current long-term projections were completed in July 2024 for the period of 2022 to 2032. This report also includes industry employment level comparisons from QCEW data over the most recent five years to provide context.

This report focuses on occupations with high demand or significant job growth and high pay rates as required by statute. While not all occupations are specific to a single industry, the occupational listings in this report are generated within each industry by use of TWC's staffing patterns.

The location quotient (LQ) is a comparison ratio of employment for that occupation in Texas to the United States. A LQ higher than one means an occupation is more concentrated in Texas than in the nation, while a LQ less than one means an occupation is less concentrated in Texas than in the nation. LQ data is obtained from the Bureau of Labor Statistics' Occupational Employment and Wage Statistics 2024 data.

For determination of industry certifications, TWC used data from Lightcast for August 2019 and August 2024. The job listings data captured by Lightcast is from online ads from a broad and comprehensive set of job boards.

835 For topics regarding occupational education, training, and experience requirements,
836 TWC considered the 2022 educational attainment identified by the Bureau of Labor
837 Statistics.

838 For identifying occupations heavily involved with science, technology, engineering, and
839 math (STEM), TWC used Labor Market and Career Information's web application,
840 Texas Labor Analysis as determined by the Texas Education Agency.

841 For identifying which occupations are considered apprenticeable in Texas, TWC used
842 the list of occupations approved for apprenticeship published by the United States
843 Department of Labor Office of Apprenticeship.

844 In this report, a firm refers to a business entity recognized as a single employer
845 covered under Texas Unemployment Insurance which may operate across multiple
846 locations or sites. Each distinct location where business activities occur is termed an
847 establishment. While a firm is the overarching organization that hires and manages
848 employees, establishments are the individual physical locations under that firm where
849 operations take place.

850 There is no official definition of a "high-wage" job and the term may be interpreted
851 differently by individuals depending on their age, work history, education level,
852 geographic setting, ability to stay at a job for the long-term, and even their personal
853 expectations in life. The median pay across all occupations in Texas is \$47,499 a year,
854 according to the 2024 OEWS estimates of Texas employers which represents the most
855 recent data for the time of this publication. For the purposes of this report, TWC only
856 looked at occupations where the industry annual median pay was estimated to be
857 higher than the statewide median, \$47,499 a year, and with a long-term projected
858 employment change greater than or equal to 400. All occupations meeting these
859 requirements are listed per industry.

860 When establishing a baseline for identifying high-demand occupations in Texas, it is
861 important to use a criterion that is meaningful across industries of very different sizes
862 and growth patterns. Employment levels in Texas vary significantly by sector, some
863 industries are very large and add thousands of jobs annually, while others are much
864 smaller or experience slower, steadier growth. Because of this, setting the
865 employment-growth threshold too high would disproportionately filter out occupations
866 in industries where growth is modest or where total employment is smaller.

867 By selecting a threshold of 400 or more jobs added, we balance the need to identify
868 occupations with meaningful statewide demand while ensuring that smaller or slower-
869 growing industries are not unintentionally excluded. This approach helps create a
870 more accurate and inclusive picture of growth occupations across Texas,
871 acknowledging both labor-market diversity and data limitations.
