INTRODUCTION

The Texas Workforce Commission (TWC) is pleased to present this report in compliance with legislative requirements. The Business Enterprises of Texas (BET) Customer Satisfaction Survey and Cost Analysis Report is submitted pursuant to TWC Rider 36, as part of the TWC performance reporting for the BET program during the 2022–2023 biennium. Rider 36 reads as follows:

“The Texas Workforce Commission shall report by October 1 of each year of the biennium the following information to the Legislative Budget Board and to the Governor:

- a. The results of the survey and the Cost Analysis Report distributed to state host agencies on satisfaction of operational conditions such as pricing requirements, hours of operations, menu items, and product lines; and
- b. The total cost incurred by each state host agency for the operation of Business Enterprises of Texas cafeterias, snack bars, and convenience stores. Reported costs should include the value of the space used, maintenance costs, utility costs, janitorial costs, and the method of finance for each cost. An outline of the methodology that was used to determine the final estimate should also be included in the report.

The Customer Satisfaction Survey and Cost Analysis Report shall be prepared in a format specified by the Legislative Budget Board and by the Governor.”

The Survey of Customer Satisfaction was distributed to all state agencies in which BET operates a food service cafeteria, snack bar, convenience store, grab-and-go store, or micro market.

The survey has been administered in the summer months since its inception in 2011; however, survey response rates have declined significantly in the pandemic and post-pandemic period, as host agencies adopted increased telework options for their employees. This, coupled with traditionally higher levels of employee leave during the summer vacation period, resulted in very low response rates when the 2023 survey was administered in June. To improve response rates and ensure sufficient feedback from customers of BET facilities, BET administered the survey again in September 2023, this time receiving twice the number of responses as received in June.

To improve ease of response, BET also streamlined the survey, reducing the total number of questions by half. Additionally, BET increased communication with agencies that host BET facilities to better promote survey availability.

Finally, BET has recently opened several facilities using new food service models, such as grab-and-go locations and micro markets. This year’s survey included the new facilities and other existing facilities that were previously converted from a vending configuration to that of a micro market.

Actions Taken as a Result of the 2022 Customer Satisfaction Survey

BET distributed survey results to licensed facility managers. BET reviewed responses with the managers—both positive and negative—to examine areas of improvement and recognize commendable practices. Managers were charged with making improvements accordingly. BET also continues to research new models and service strategies to improve customer satisfaction.

SUMMARY OF THE 2023 CUSTOMER SATISFACTION SURVEY RESULTS

Survey results generally reflect a positive perception of BET-operated facilities. A total of 92 percent of respondents agreed that BET facilities' operating hours are conducive to their daily schedule. Additionally, 76 percent of respondents agreed that BET facilities provide a wide variety of food and beverage choices, and 75 percent of respondents agree that healthy choices are readily available. More than 80 percent of respondents rate the quality of products and the quality of service at three or more stars, expressing positive responses overall regarding their experience with BET facilities.

BET managers remain committed to having operating hours that support ease of access to facilities, offering

options that meet the diverse tastes and dietary preferences of their customers, and providing excellent customer service in a welcoming, customer-friendly atmosphere.

The 2023 survey results provide feedback that will help BET identify strategies to enhance customer satisfaction, including continued exploration and implementation of new food service models that match customer preferences. These new models are often more feasible than traditional food service operation for buildings that have implemented hybrid work schedules and therefore have lower daily occupancy levels.

2023 CUSTOMER SATISFACTION SURVEY RESULTS

The following tables and graphs reflect the 691 responses to the topics addressed in the streamlined survey instrument. Excluding questions about BET facility locations and their respective host agencies, six of the 13 remaining questions are essentially consistent from 2022 to 2023, and five of those are directly comparable. For the five questions, the graphs also reflect 2022 survey results.

The following table and corresponding graph demonstrate the rate of positive comments compared to positive responses to the previous year's questions that are essentially consistent from 2022 to 2023.

Positivity Rates 2023 Compared to 2022			
Question	2023	2022	+/-
